

AMENDMENTS TO THE SPECIFICATION:

Page 7, replace the paragraph, beginning on line 7, with the following amended paragraph:

--A motorcycle construction according to the invention [[and]] permits a rider to assume either a first elevated crouched racing position, or a second lowered, reclined, feet-forward "custom chopper" position. The motorcycle illustrated in Figs. 1 to 8 comprises a main frame assembly (1) provided with a front wheel suspension assembly (2), holding a front wheel (3) as well as a handlebar assembly (9, see Figs. 11 and 12), and a rear wheel suspension assembly (4) holding a rear wheel (5), and a drivetrain here shown as a combined engine/transmission assembly (6) arranged for driving said rear wheel (5) or said front wheel (3) or both wheels (5,3).--
